

1. State whether the following statement is True or False:

1 / 1 punto

“Integration testing is where the application or software is tested as a whole and tested against the set requirements and expectations to ensure completeness”

- ☒ True
- ☐ False

✓ **Correcto**

Correct! Integration testing is where the application or software is tested as a whole and tested against the set requirements and expectations to ensure completeness.

2. Which of the following is NOT primarily one of the four levels in testing?

1 / 1 punto

- ☒ Regression testing
- ☐ System testing
- ☐ Integration testing
- ☐ Unit testing
- ☐ Acceptance testing

✓ **Correcto**

Correct! Regression testing is a type of stress testing that ensures stability of code.

3. Which of the following can be considered a valid testing scenario? (Select all that apply.)

1 / 1 punto

☒ Deletion or form updation should request confirmation

✓ **Correcto**

Correct! Deletion or form updation requesting confirmation is considered a valid testing scenario.

☒ Check for negative value acceptance in numeric field

Correcto

Correct! Checking for negative value acceptance in numeric field is considered a valid testing scenario.

If the webpage resizes appropriately according to the device in use

Correcto

Correct! If the webpage resizes appropriately according to the device in use is considered a valid testing scenario.

Broken links and images should be checked before loading a webpage

Correcto

Correct! Checking broken links and images before loading a webpage is considered a valid testing scenario.

4. What can be considered as an ideal testing scenario?

1 / 1 punto

Designing test cases in the shortest amount of time.

Finding the maximum bugs and errors.

Writing the least number of tests to find largest number of defects.

Using the minimal number of testing tools to find defects.

Correcto

Correct! Writing the least number of tests to find largest number of defects is the ideal testing scenario.

5. Which job roles are not always a part of the testing lifecycle working on an application or product?

1 / 1 punto

Tester

Stakeholder

Project Manager

Programmers other than tester

Correcto

Correct! Stakeholders and end-users may or may not participate in the testing lifecycle.
