

1. What attribute did you apply to the number of people field to set the minimum value?

1 / 1 punto

- ☒ min
- ☐ minlength
- ☐ minimum

Correcto

Correct. The min attribute is used to set the minimum value of range inputs.

2. When you clicked the date of booking field, what was the result?

1 / 1 punto

- ☐ A slider appeared
- ☐ Nothing happened
- ☒ A date picker was displayed

Correcto

Correct. The date input type will provide a date picker to the user.

3. When you typed the word hello into the email address field and submitted the form, what was the result?

1 / 1 punto

- ☒ The web browser prompted to fix the email address format
- ☐ The form submitted successfully
- ☐ The input field changed to the color red

Correcto

That's correct! The email input type ensures correct email address formatting.
