

1. In git, the default branch of a repo is called the \_\_\_\_\_.

1 / 1 punto

- ☐ Super Branch
- ☐ Primary Branch
- ☒ Main Branch
- ☐ Secondary Branch

✓ **Correcto**

Correct! The default branch is known as the main branch, or, master branch on older repositories.

2. What is the request to merge forked changes called?

1 / 1 punto

- ☐ Code Request
- ☒ Pull Request
- ☐ Push Request

✓ **Correcto**

Correct! You open a pull request to request merging of your forked changes.

3. When you clone a forked repository, what does origin refer to?

1 / 1 punto

- ☒ The forked repository
- ☐ Another developer's repository
- ☐ The original repository

✓ **Correcto**

Correct! The origin will always default to the clone URL. In this case, the forked repository is the origin.
